

Registry Update

Diane Simpson

Robb Linkins

Terry Boyd

History of Registries

- 1974: Delaware establishes registry based on encounter data
- 1980: AIMS –Automated Immunization Management System
- 1991: Expert panel recommends national registry system
- 1992: All Kids Count funds 24 state and community registries

History – Part II

- 1993: NIP awards registry planning grants
- 1994: NVAC recommends expanded funding and new federal policies
- 1997: Presidential directive launches Initiative on Immunization Registries
- 1998: NVAC hearings on registries
- 1999: NVAC report on registry
- 2000: HP 2010 goal: 95% <6 y.o. enrolled

Immunizations Registries Phase I

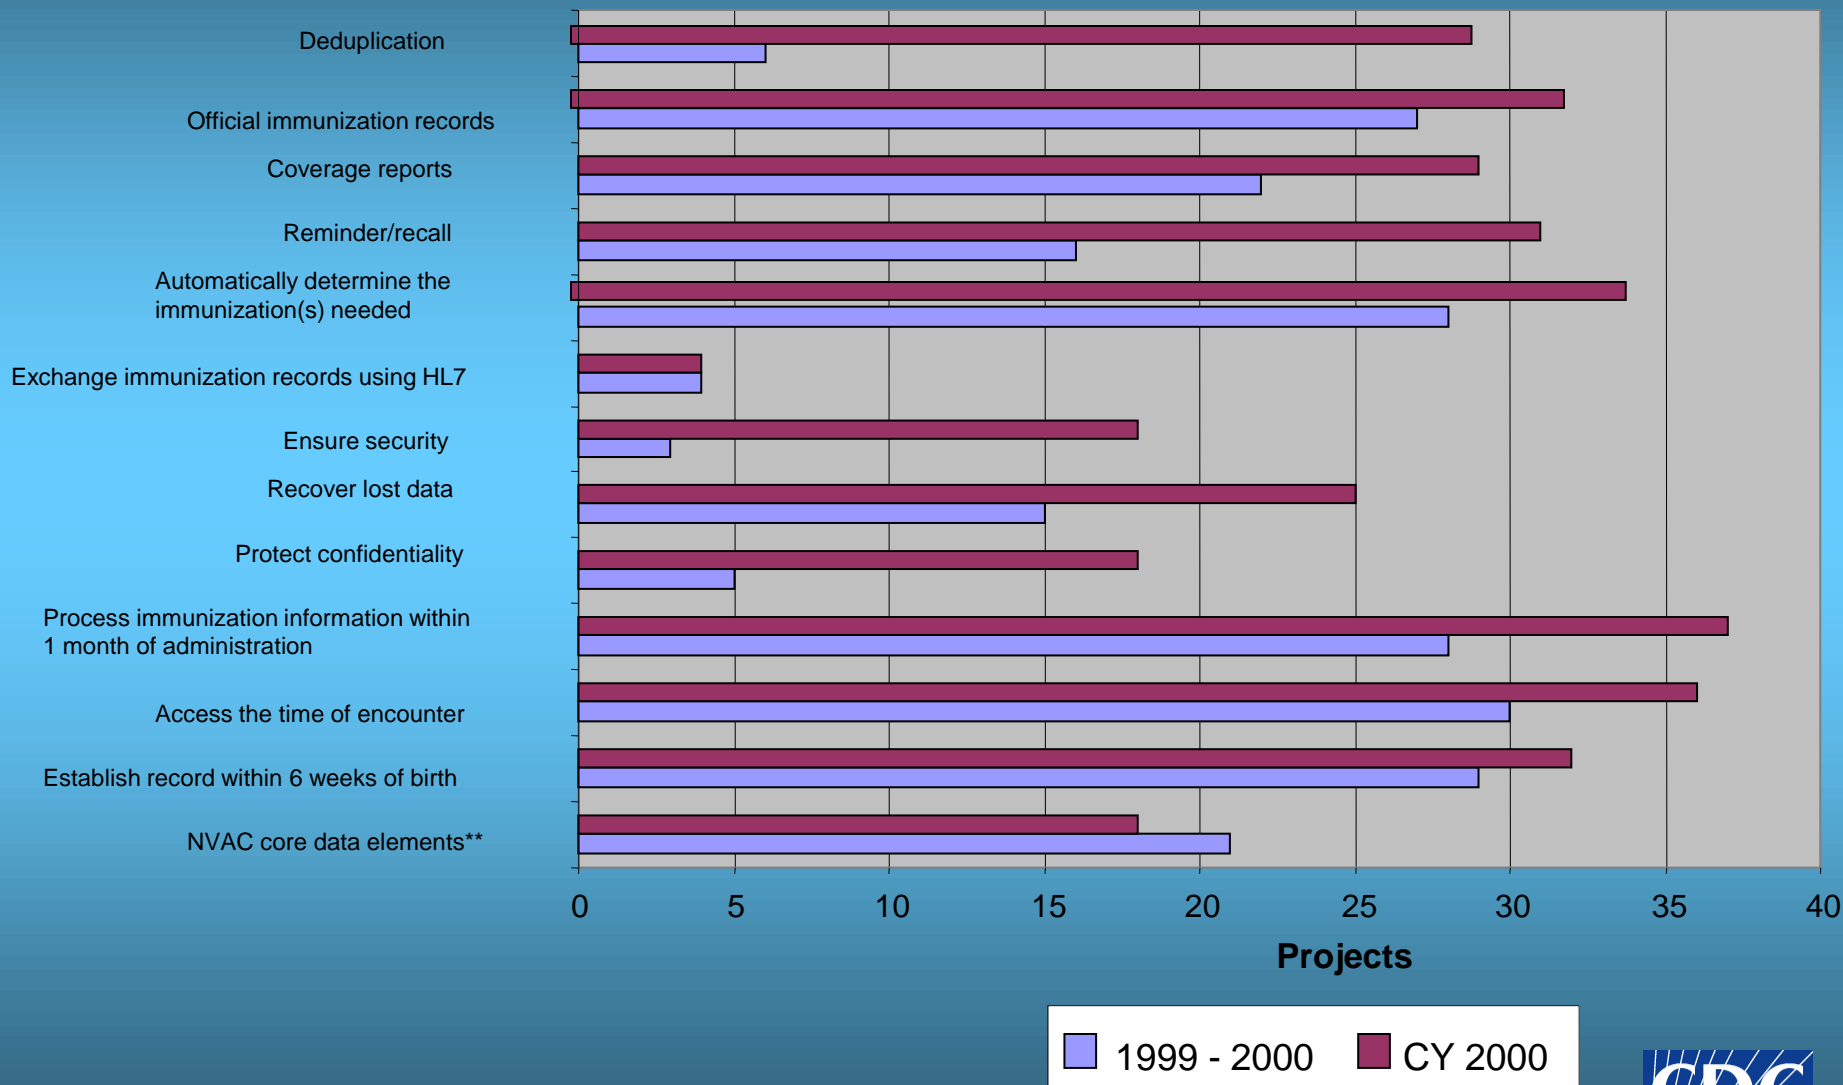

Building the Systems

Phase I Accomplishments: Building the Systems

- 1. Developing the hardware and software**
- 2. Establishing necessary laws and rules**
- 3. Developing specifications for privacy and confidentiality**
- 4. Establishing technical standards**
- 5. Outreach to providers**
- 6. Enrolling children**

Projects Meeting Functional Standards

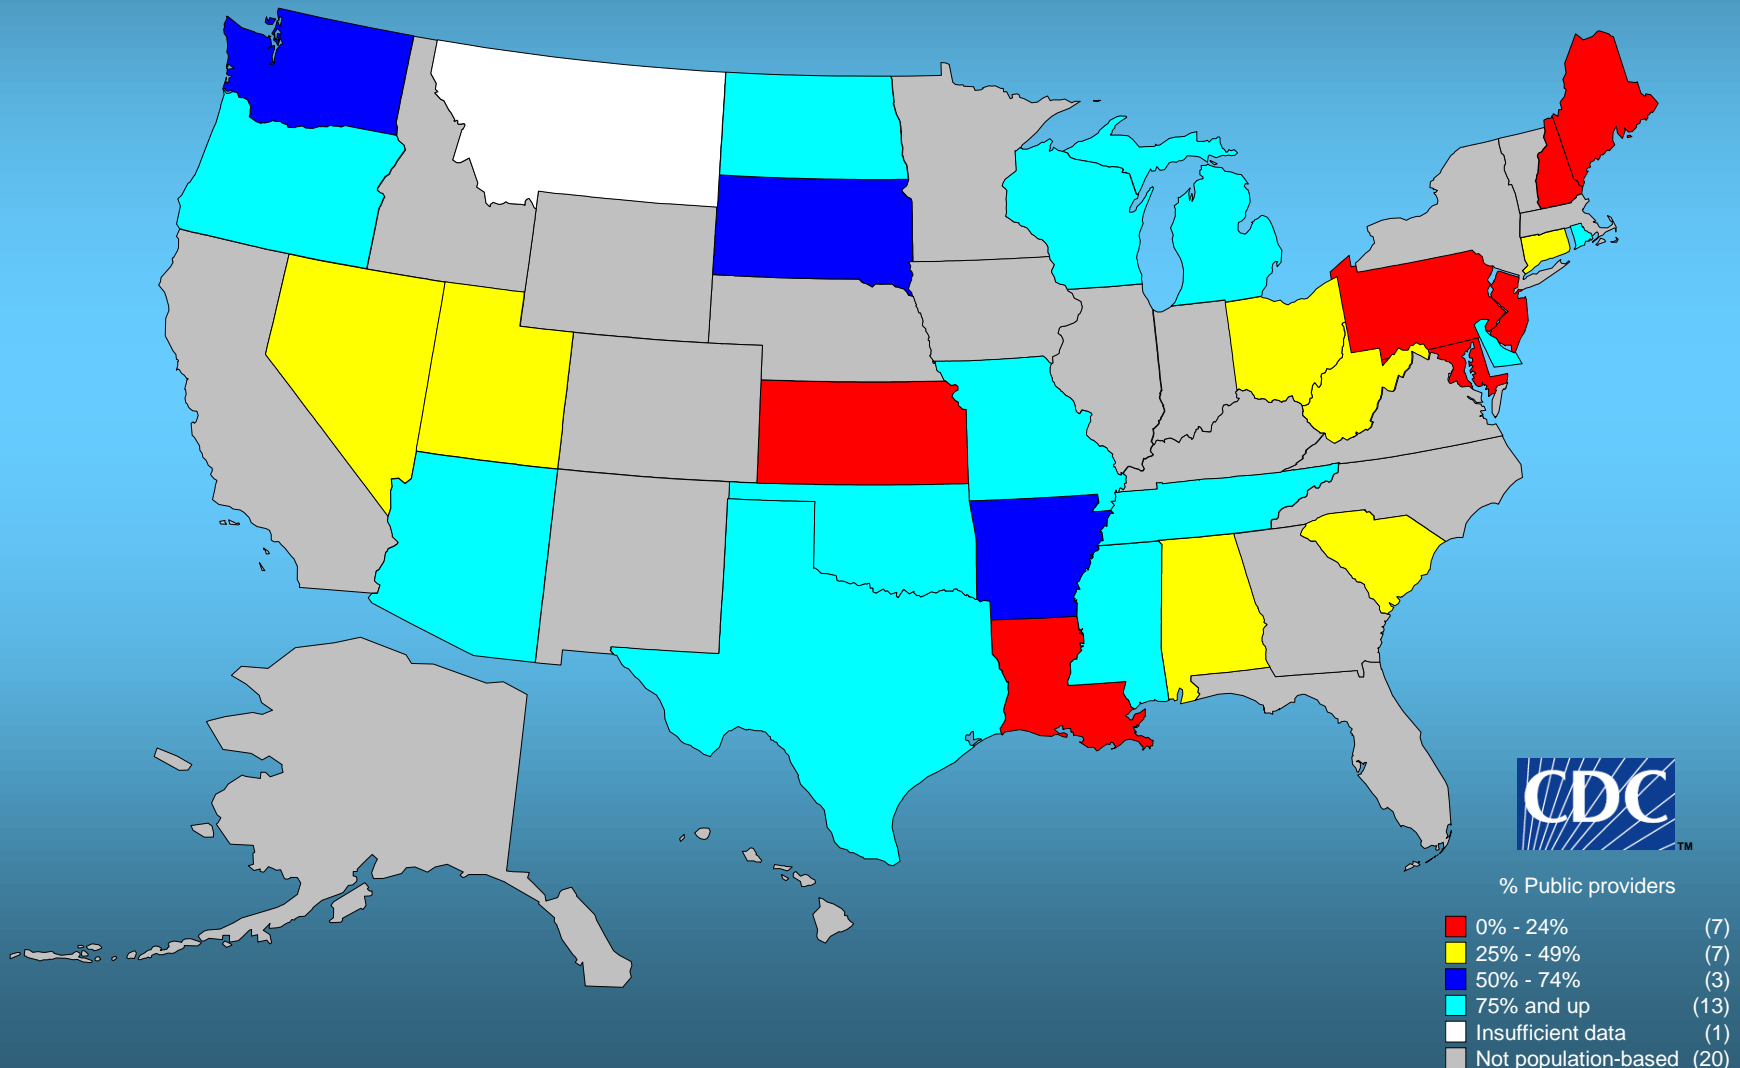

•38 Responses from population based registries

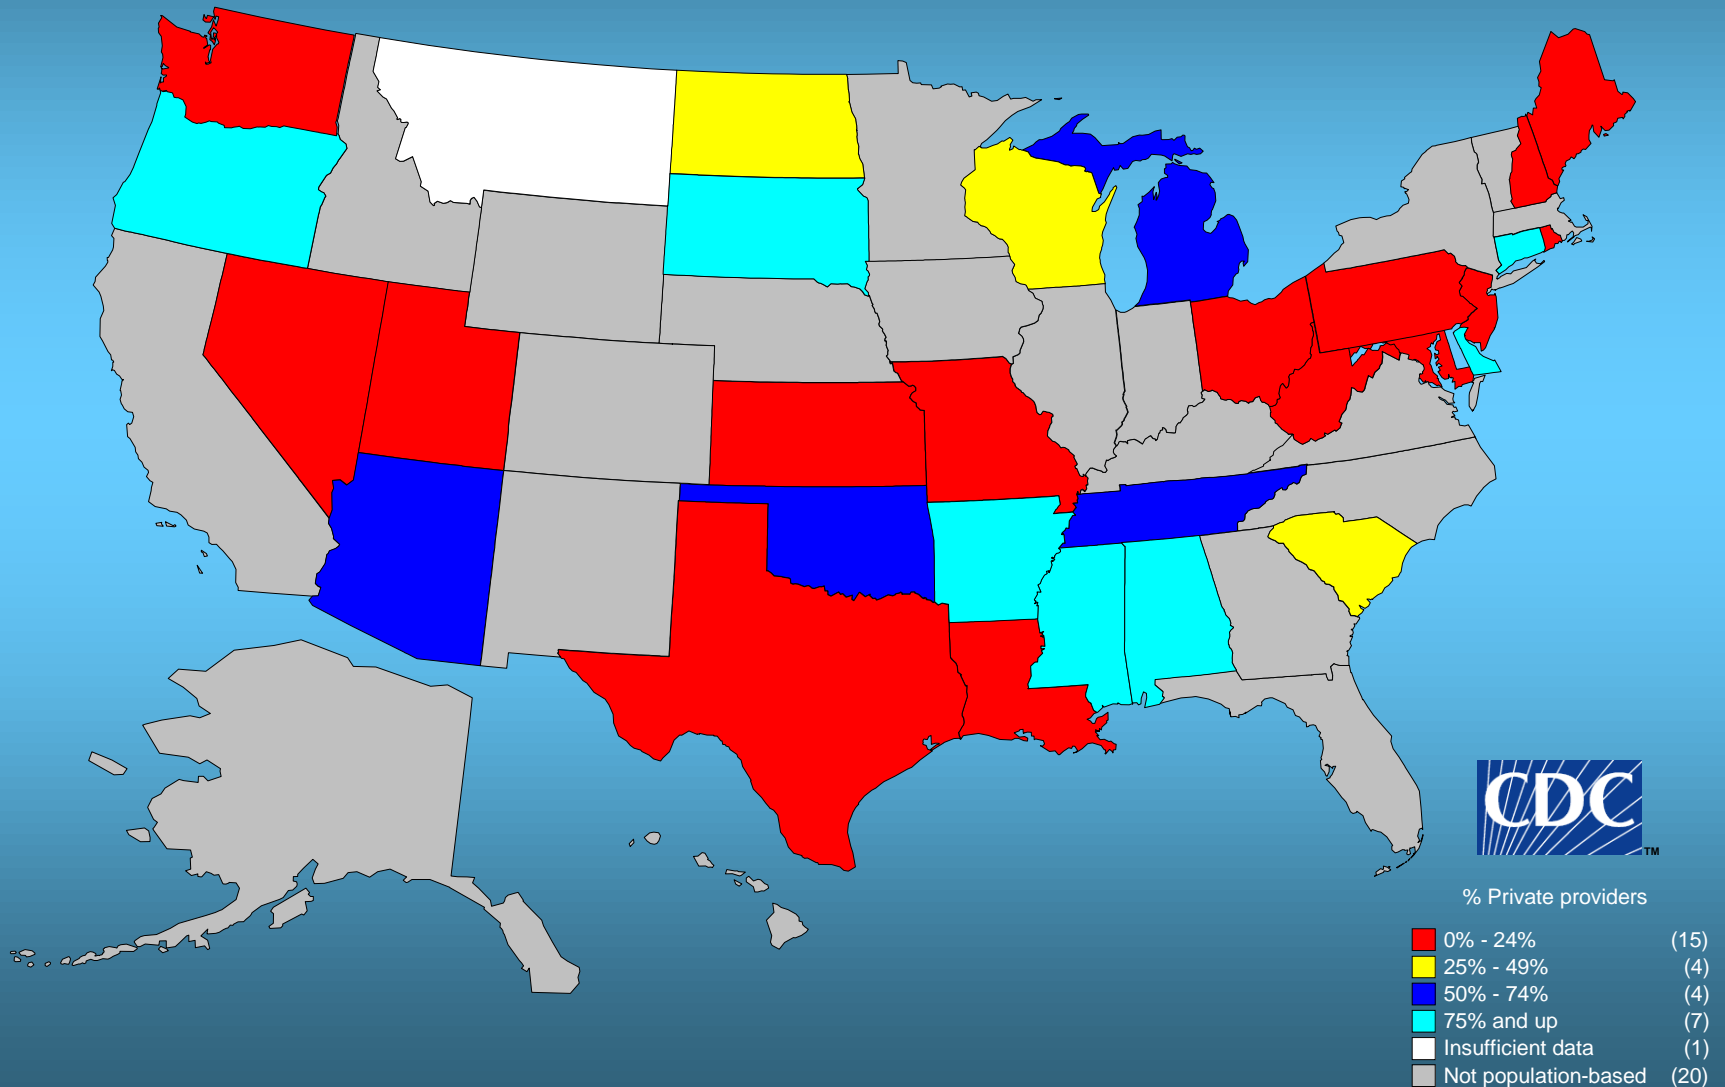

•*Quesstion changed from 99/00

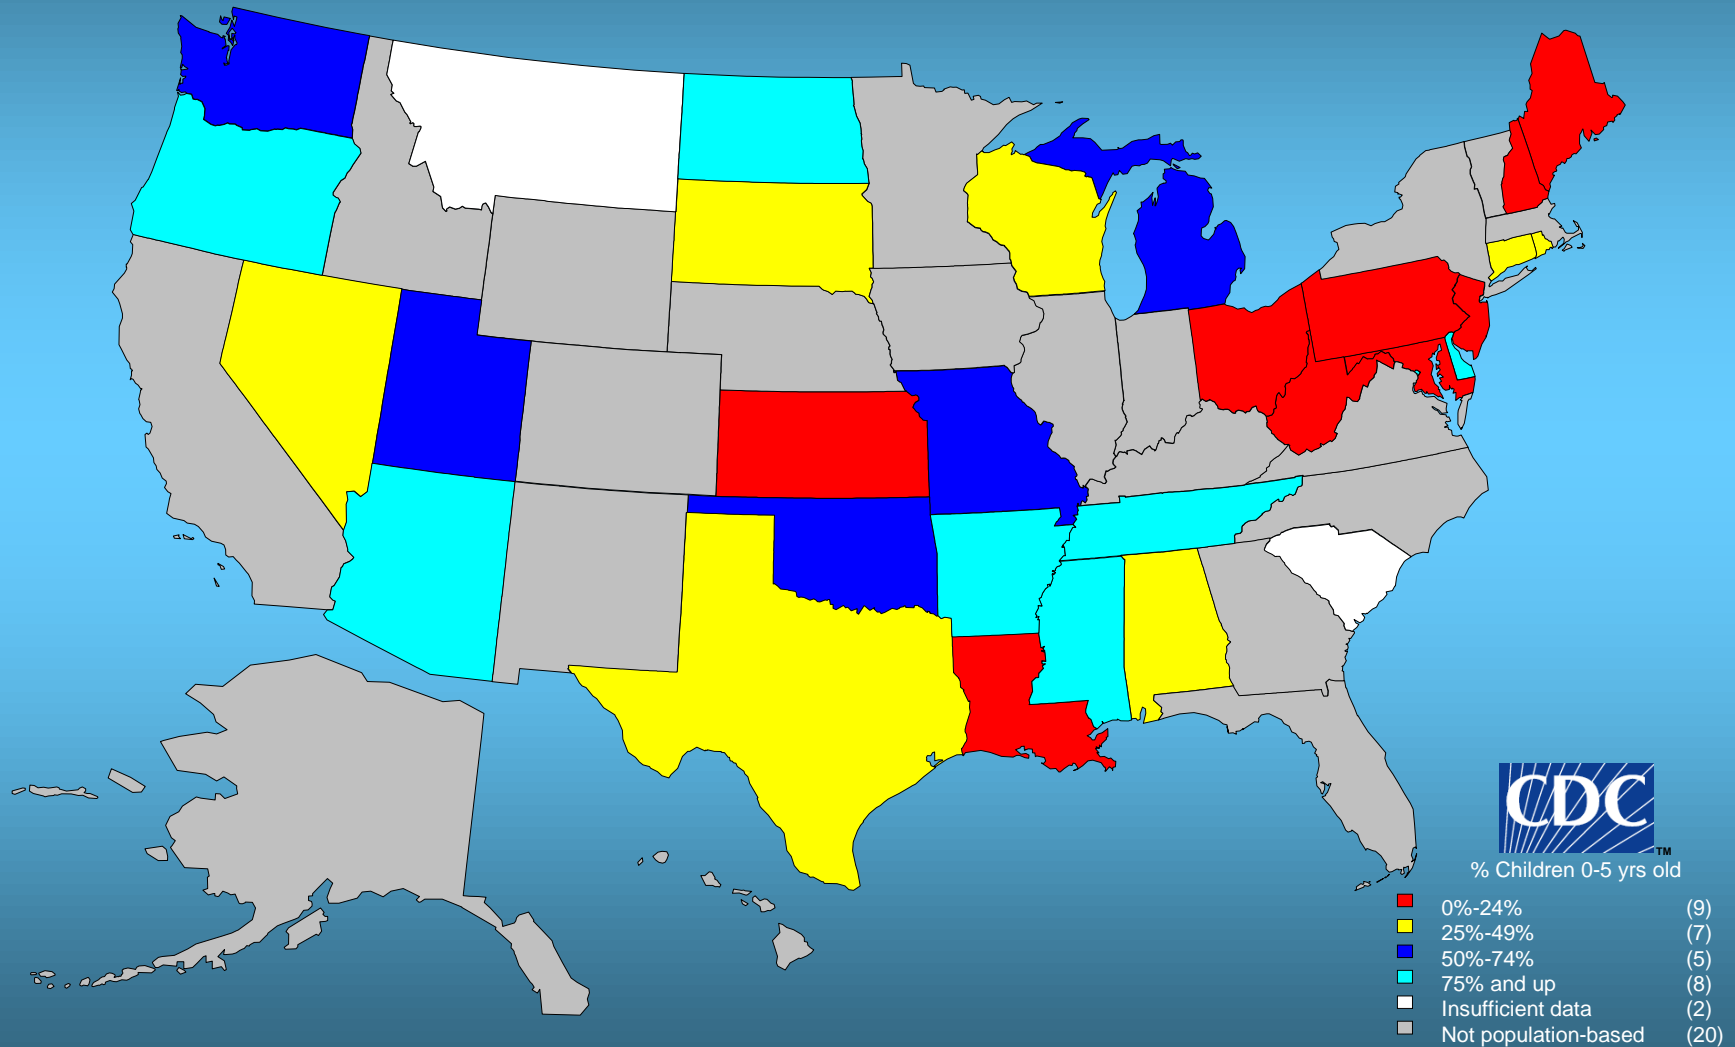

Public Provider Participation in a Population-Based Immunization Registry

Private Provider Participation in a Population-Based Immunization Registry

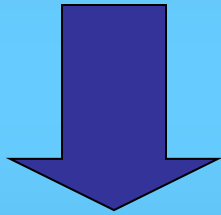

Children 0-5 Years of Age Participating in a Population-Based Immunization Registry

Where are we?

Goal

2000

22%

2010

95%

Goal Requirements:

- Enroll an additional 10% of children each year for next 8 years
- Bring remaining 24 states to status of fully functioning, state-wide registry
- Assist another 25% of public provide sites and 55% of private provider sites to participate

Immunization Registries: Phase II

Implementing the Systems

Reaching the Goal:

- 1. Think strategically
- 2. Work cohesively
- 3. Implement creatively

Think Strategically

- Develop a national strategic plan on how best to reach HP 2010 Goal
 - Set timed, realistic goals
 - Determine best methods
 - Implement and monitor activities
 - Measure achievement

Work Cohesively

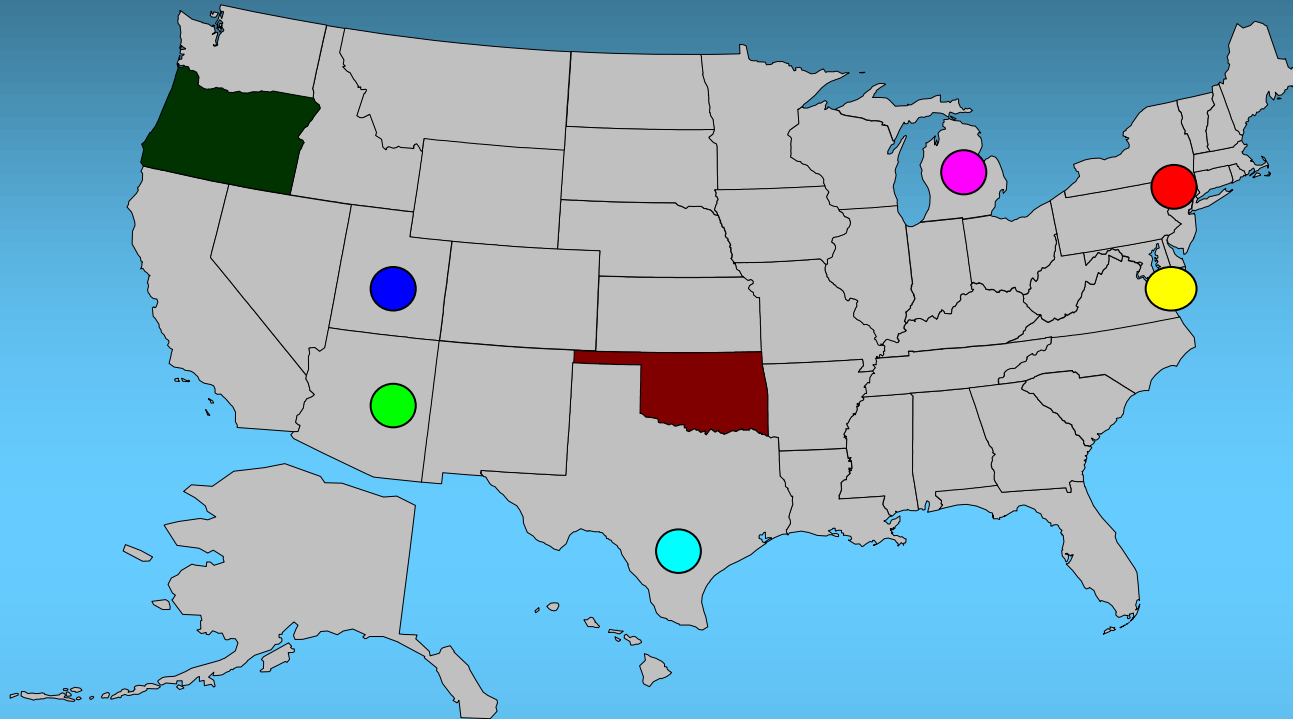

- State and Local Health Department involvement in goals and objectives of strategic plan
- Coordinated activities through national organizations (AIRA, ECBT) and events
- National standards accepted and adopted

Implement Creatively

- **Every Child By Two Awards:**
 - **Arkansas:** Recalled children who had received invalid doses of vaccine
 - **Oklahoma:** Assessed IPV implementation
 - **Sentinel Sites**
 - **Cities, states or counties where a subset of children <6 routinely added to registry**
 - **Sites used to monitor coverage and do special studies**

Registry Sentinel Sites

New York City: 9 private providers (16,588)

Oregon: Managed care (10,533)

Michigan: Jackson, Kent, Muskegon Counties (92,879)

Utah: Utah County Health Department (22,500)

San Antonio: WIC (32,410)

Arizona: Coconino County (12,294)

Oklahoma: Public health clinics (160,000)

Washington, D.C.: Medicaid Managed Care (18,605)
