- 36.4% of Consortia clients received ADAP (38.1%)

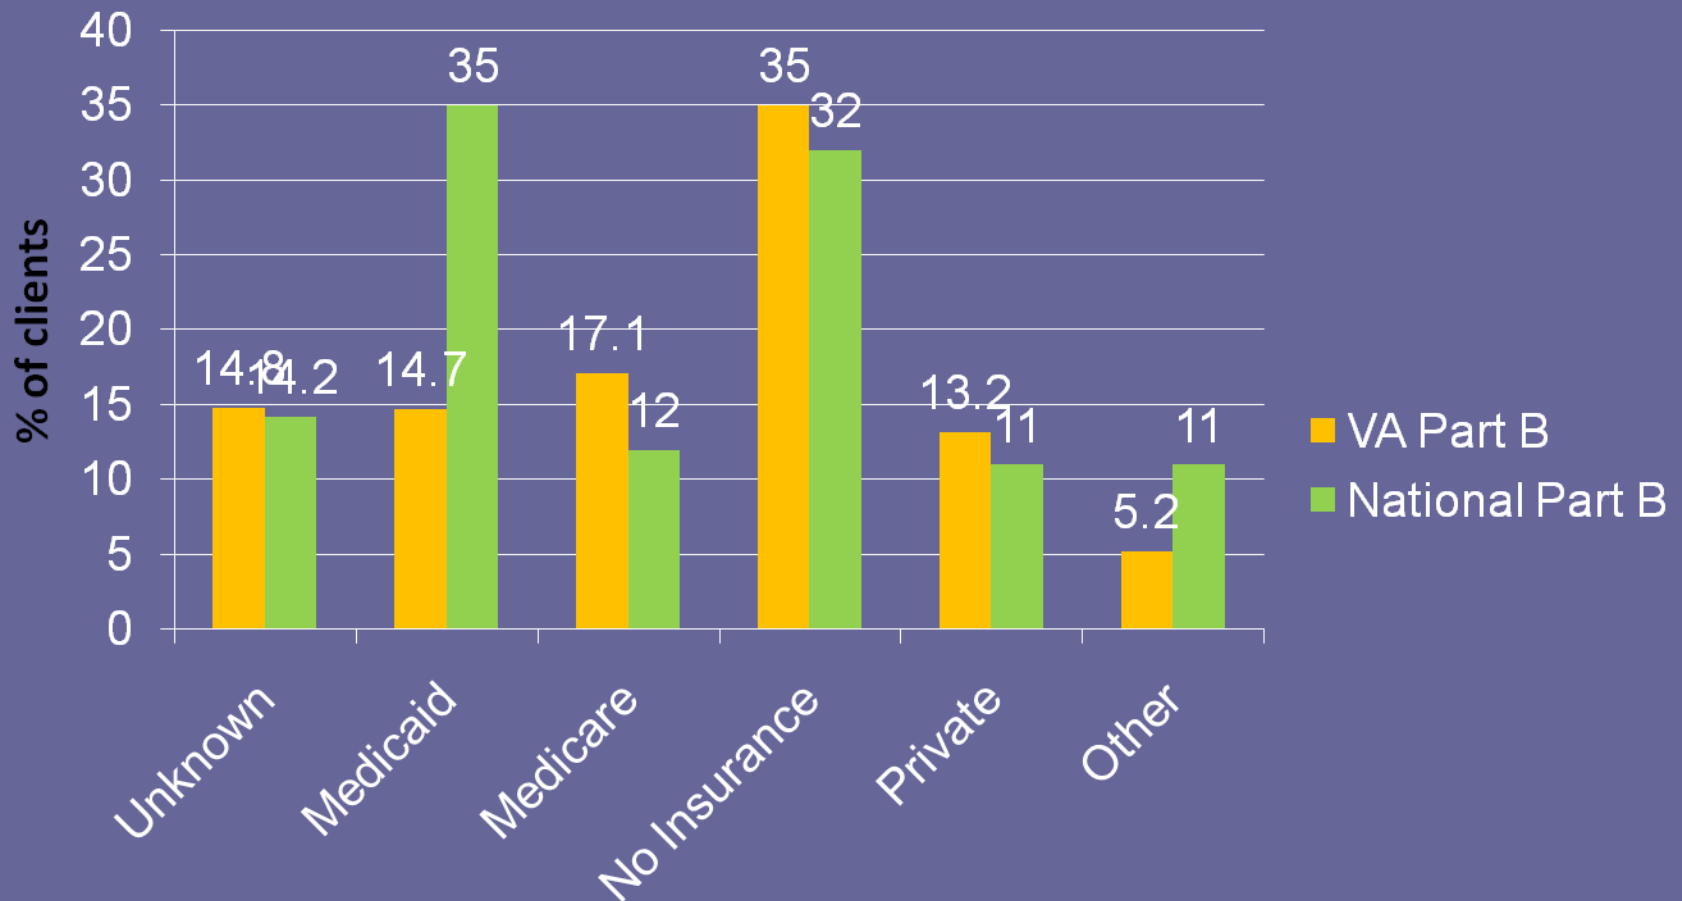

* Numbers in parentheses are from one year ago (April 2007 to March 2008)

VA Part B and National Part B: Income

* Source for National Part B: <http://hab.hrsa.gov/publications/progressreport08/chapter8.htm>

VA Part B and National Part B: Health Insurance

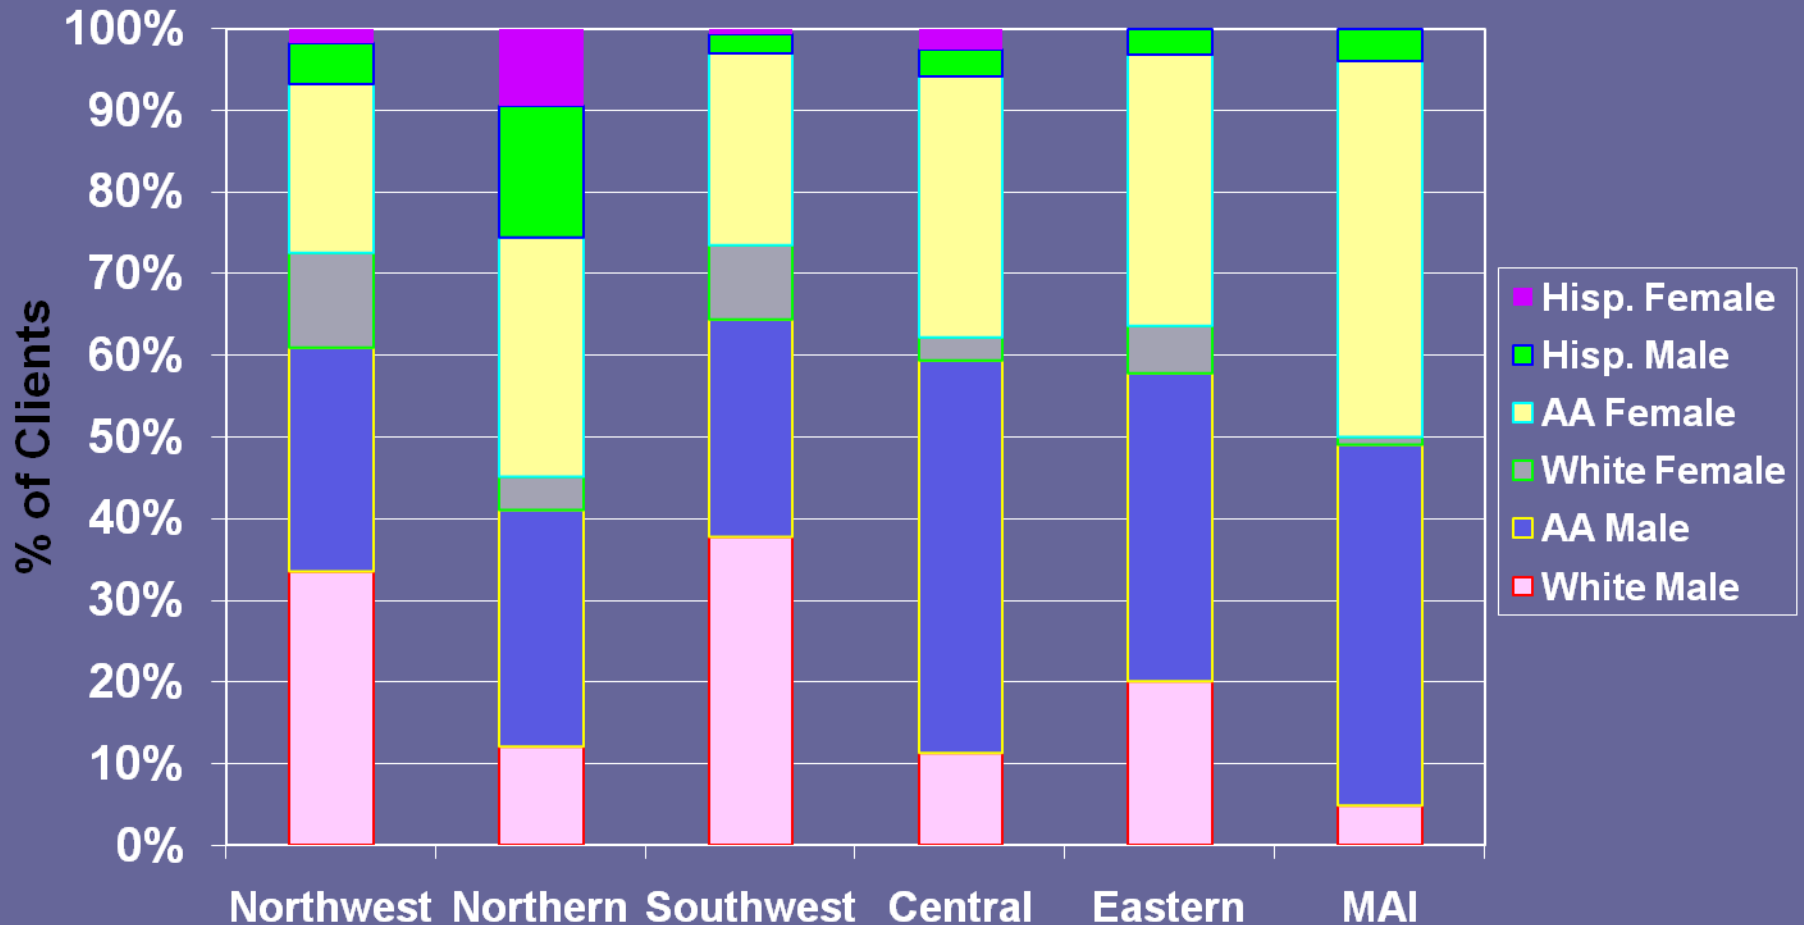

* Source for National Part B: <http://hab.hrsa.gov/publications/progressreport08/chapter8.htm>

MAI Summary: April 2008 to March 2009

- Served 133 Clients
- 38 (28.6%) enrolled in ADAP in same time period
- Provided 182 outreach encounters
- 73.7% (n=98) of MAI clients were new

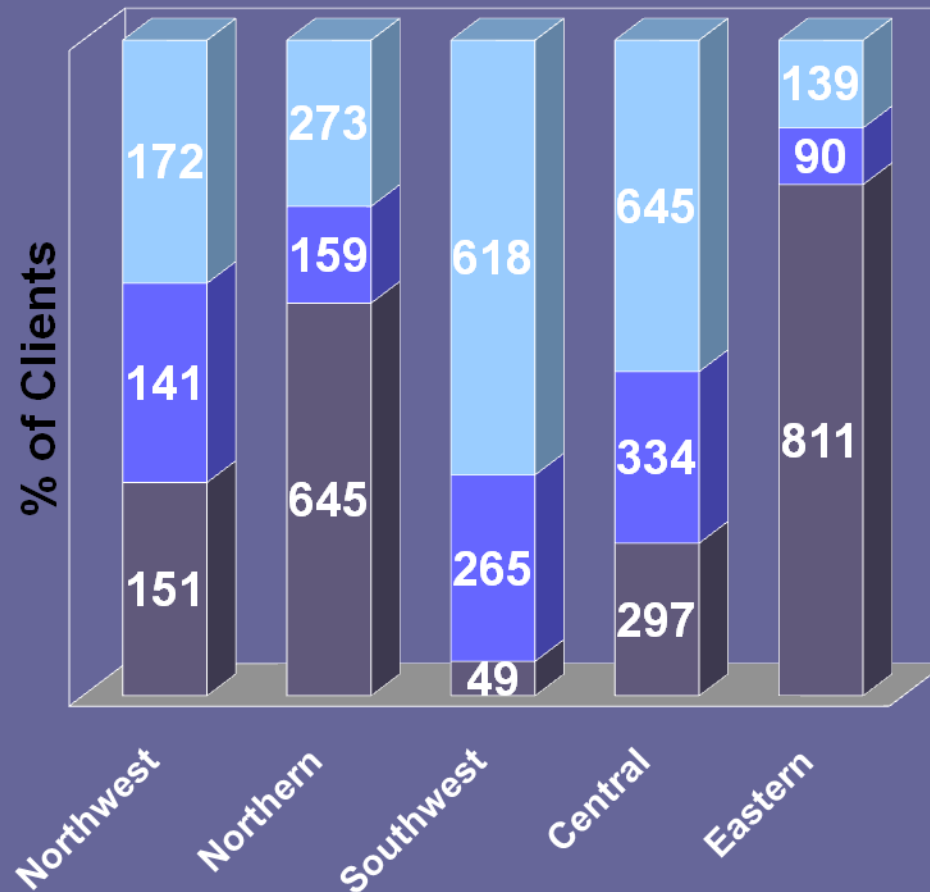

Part B Statewide Summary: Clients Served by Region – Race/Gender

ADAP and Consortia by Region

April 2008 to March 2009

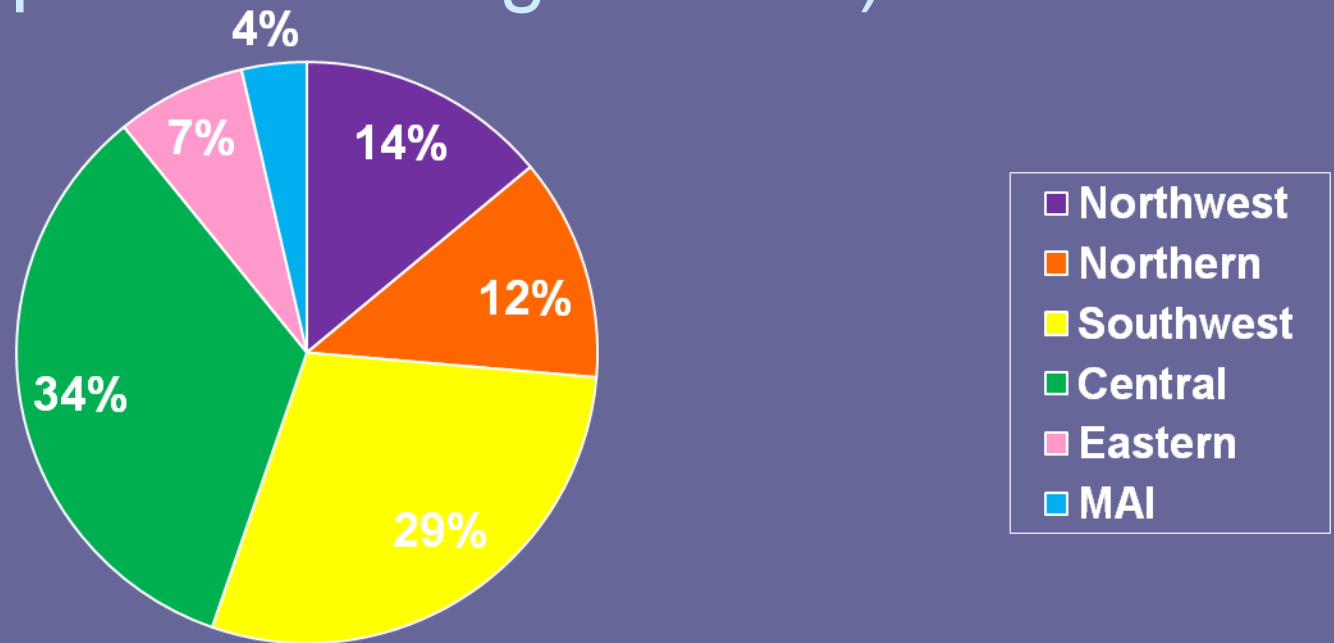

□ ADAP only ■ ADAP and Consortia ■ Consortia only

Clients Served by Region April 2008 to March 2009*

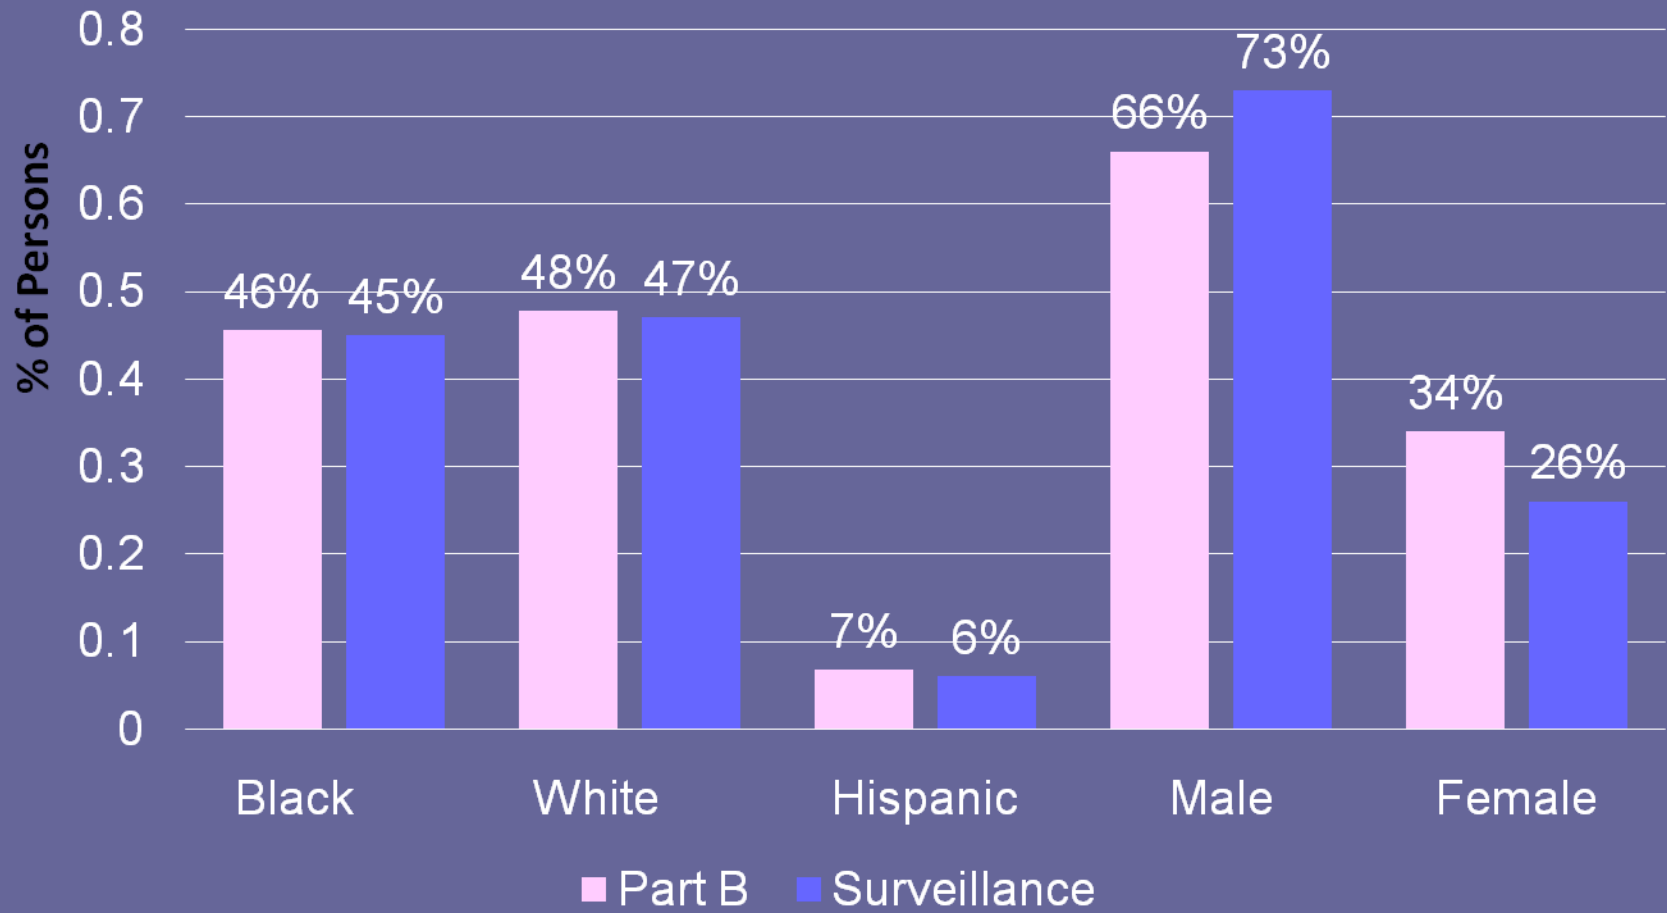

N (unduplicated) = 3212

N (duplicated at region level) = 3513

* Percentages based on duplicated client count at regional level

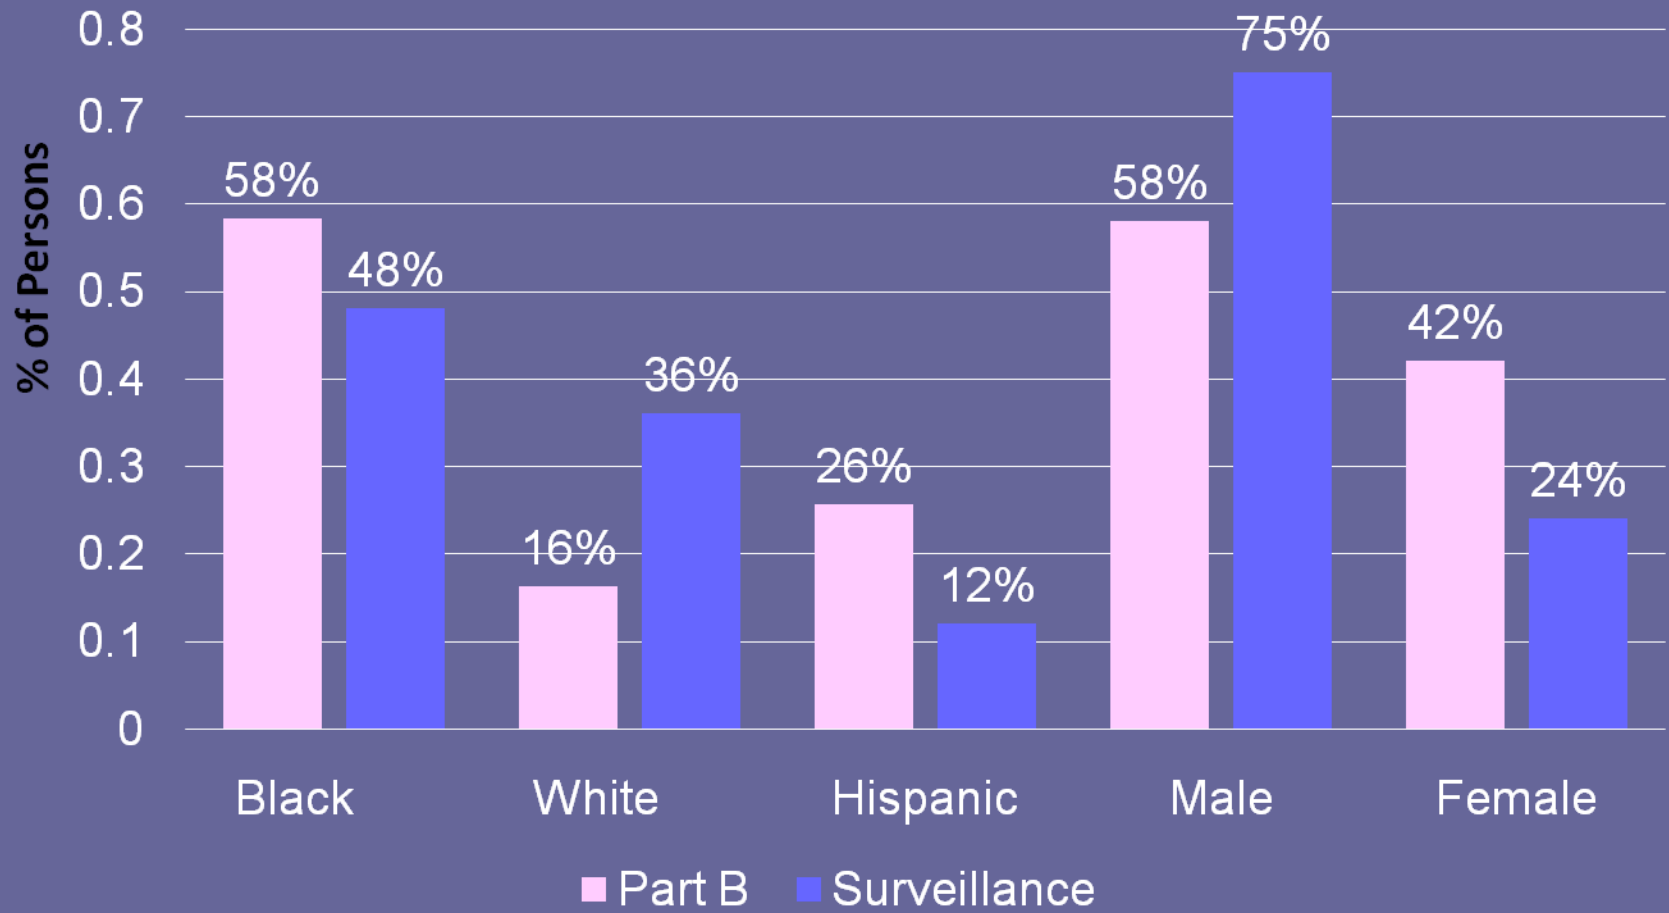

Part B and HIV Surveillance: Northwest

HIV surveillance are persons living with HIV/AIDS through December 31, 2008

Source: <http://www.vdh.state.va.us/epidemiology/DiseasePrevention/DAta/documents/table2.pdf>

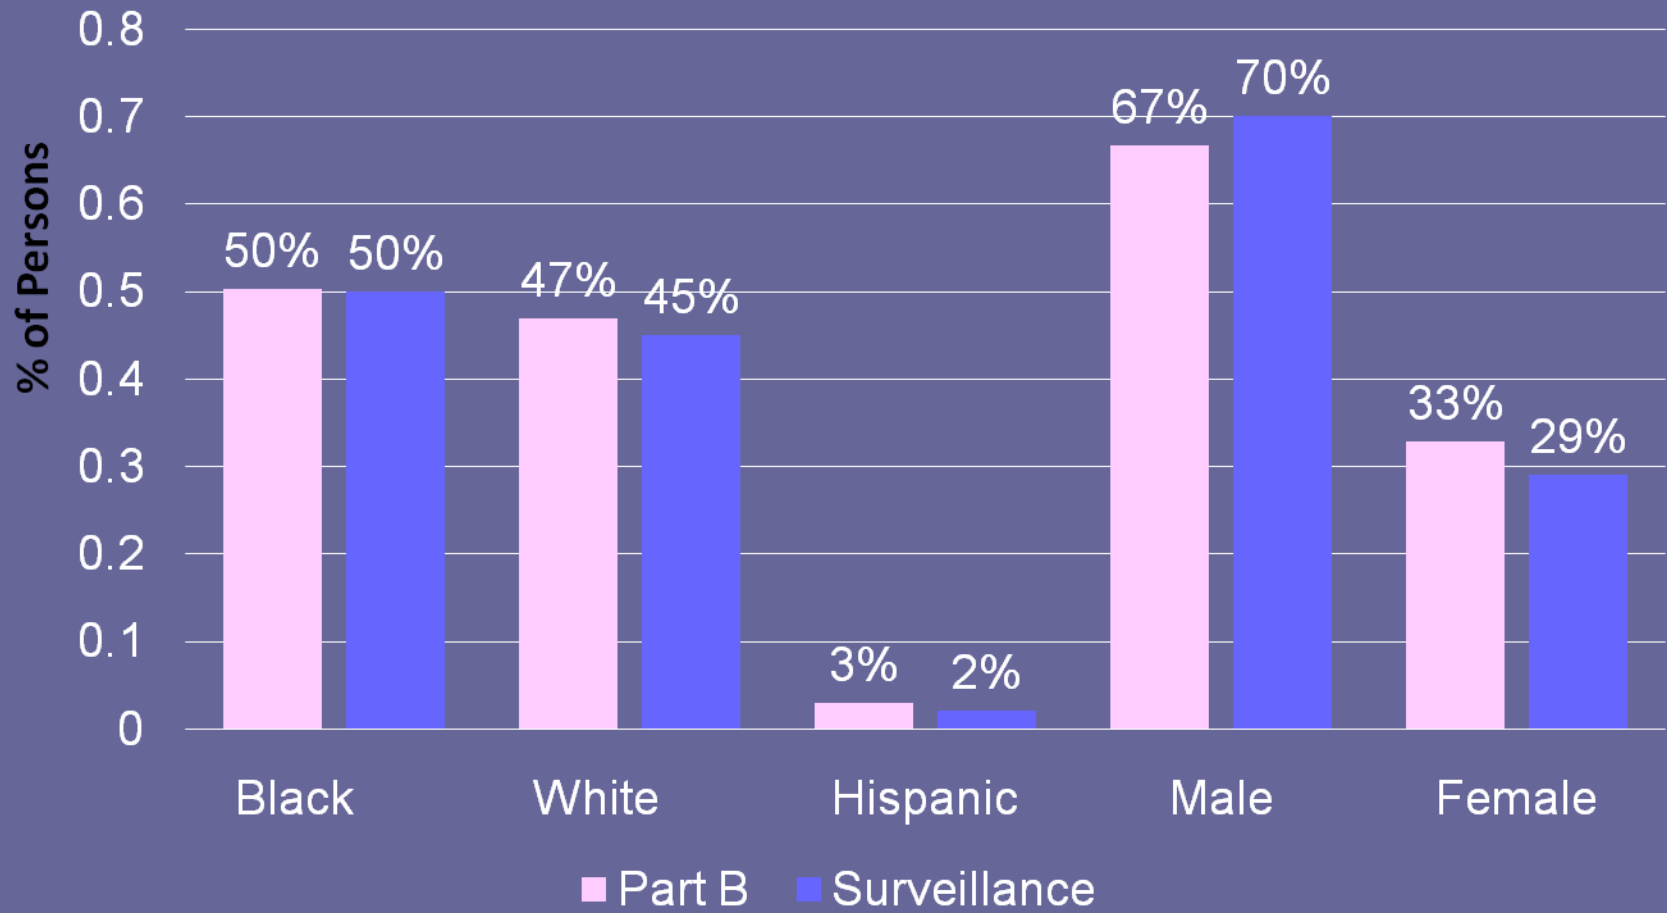

Part B and HIV Surveillance: Northern

HIV surveillance are persons living with HIV/AIDS through December 31, 2008

Source: <http://www.vdh.state.va.us/epidemiology/DiseasePrevention/DAta/documents/table2.pdf>

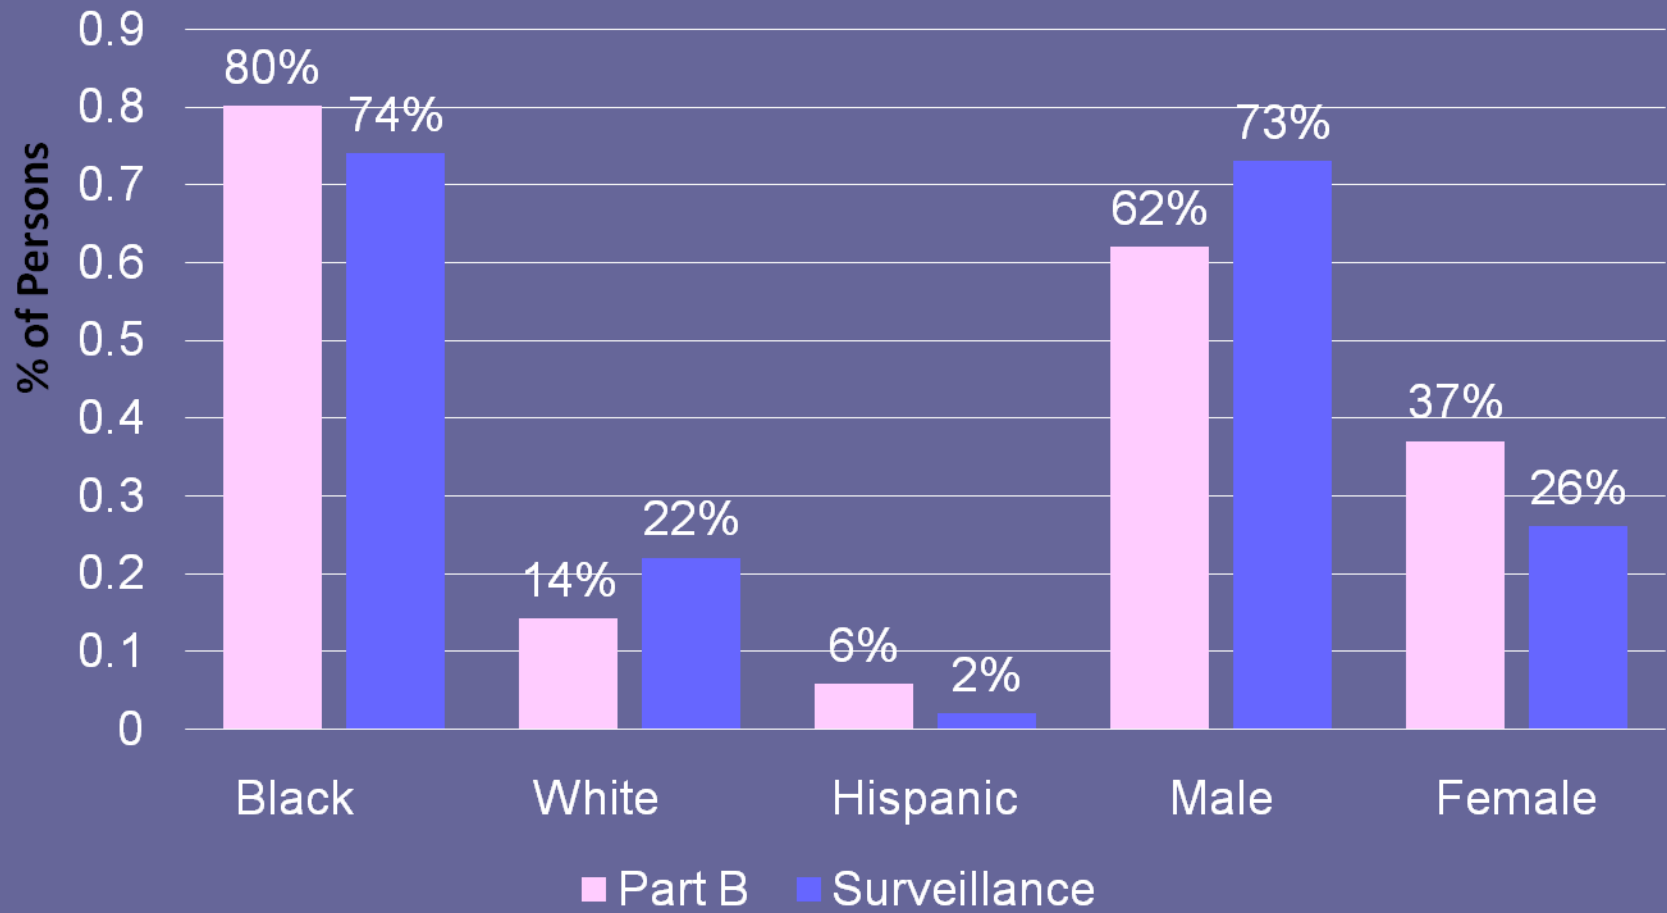

Part B and HIV Surveillance: Southwest

HIV surveillance are persons living with HIV/AIDS through December 31, 2008

Source: <http://www.vdh.state.va.us/epidemiology/DiseasePrevention/DAta/documents/table2.pdf>

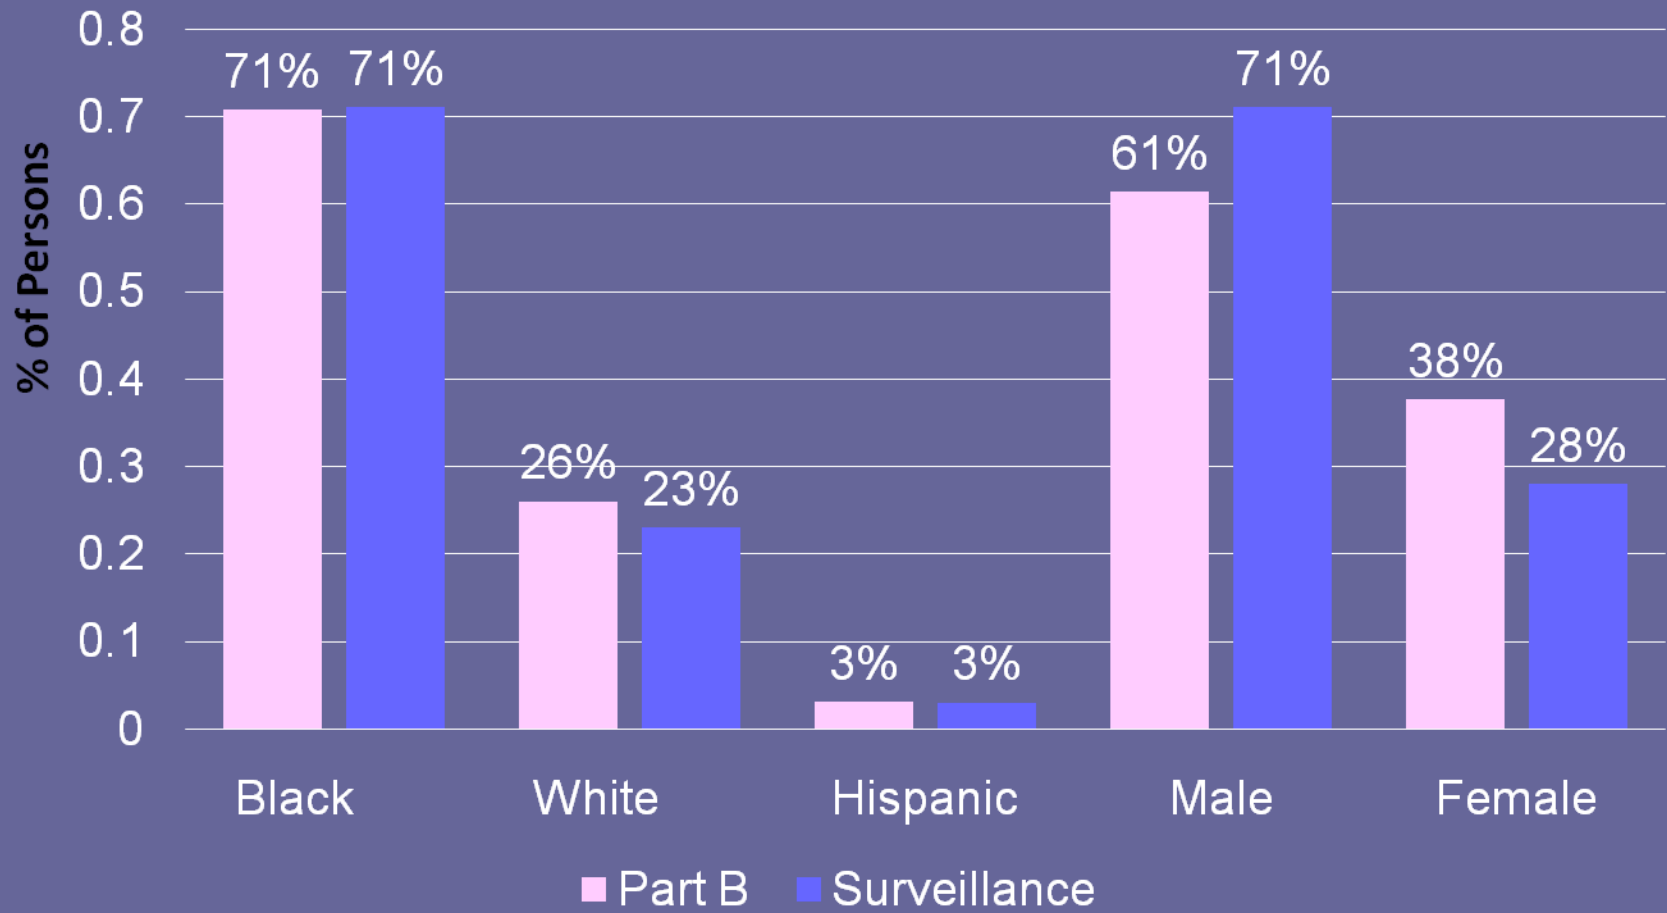

Part B and HIV Surveillance: Central

HIV surveillance are persons living with HIV/AIDS through December 31, 2008

Source: <http://www.vdh.state.va.us/epidemiology/DiseasePrevention/DAta/documents/table2.pdf>

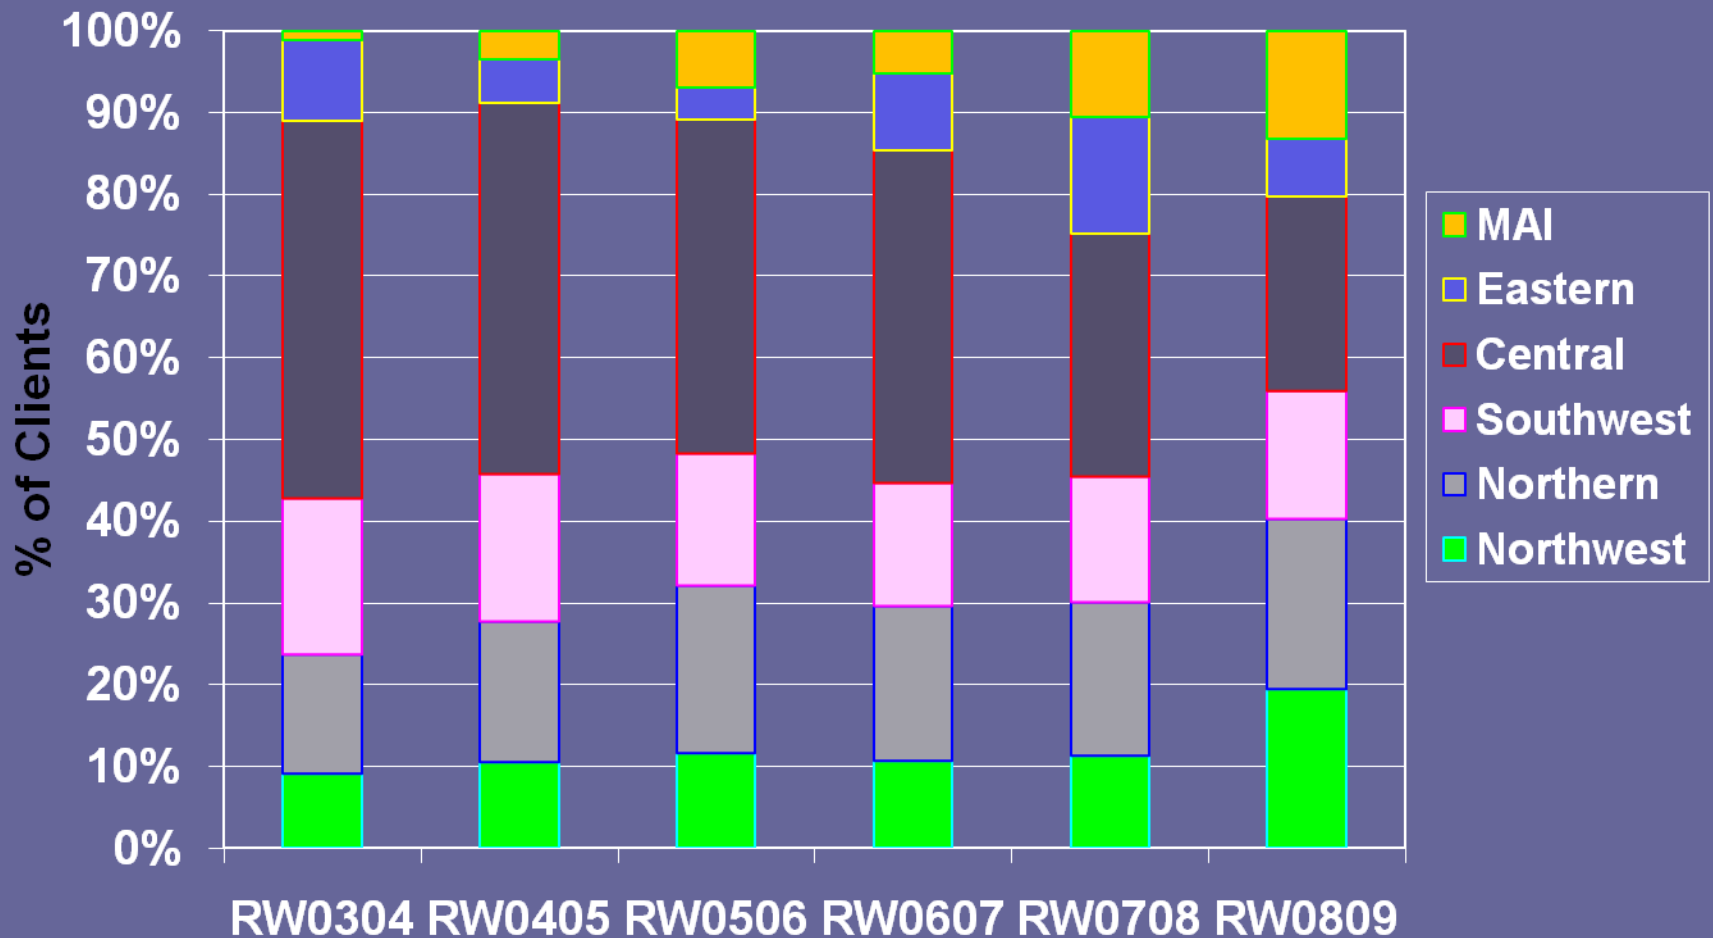

Part B and HIV Surveillance: Eastern

HIV surveillance are persons living with HIV/AIDS through December 31, 2008

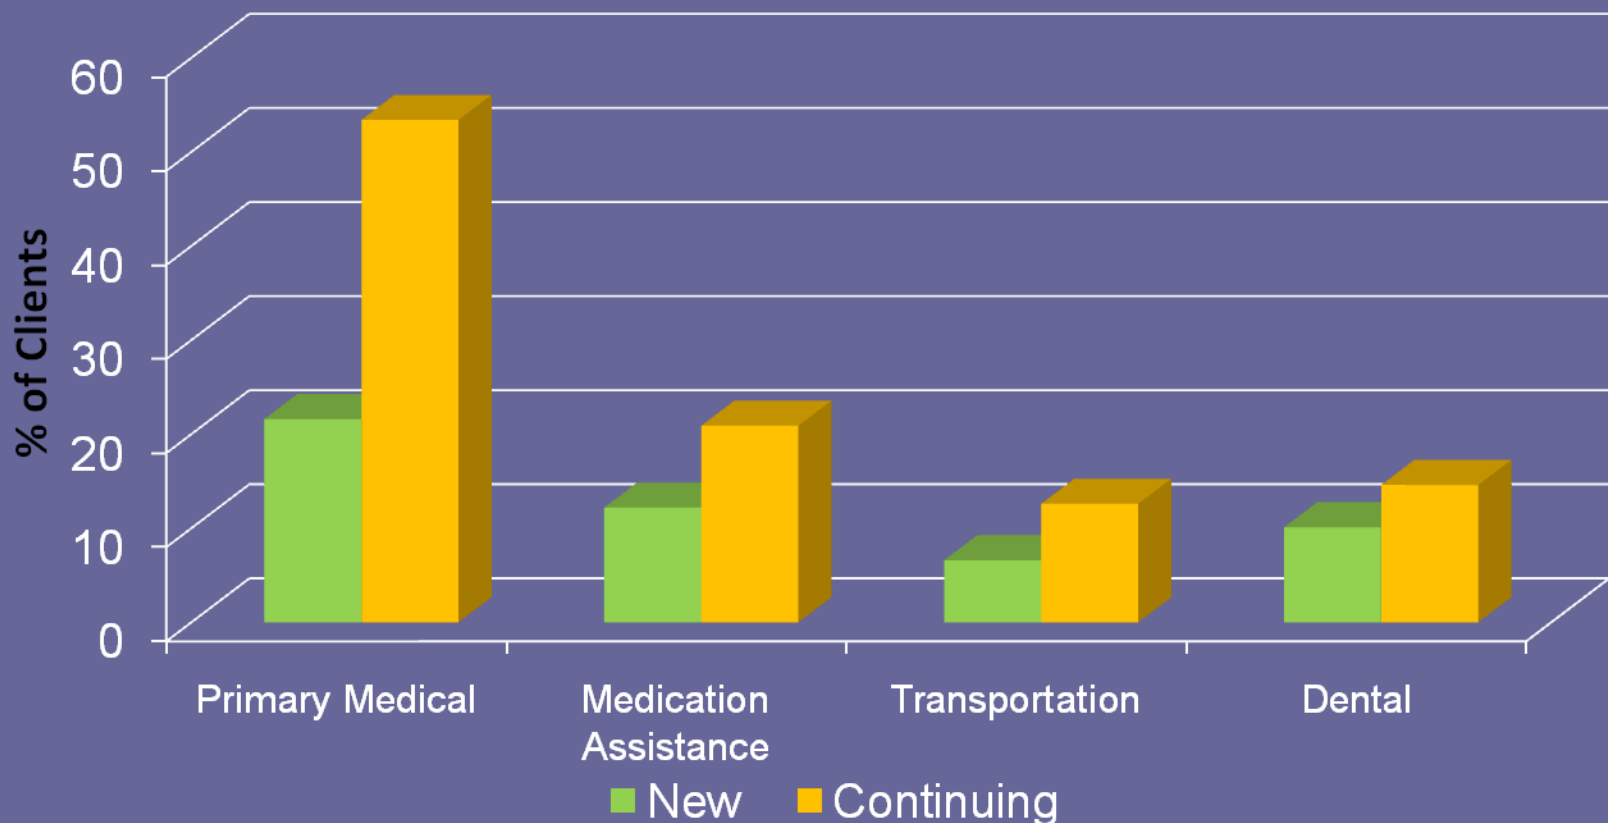

Source: <http://www.vdh.state.va.us/epidemiology/DiseasePrevention/DAta/documents/table2.pdf>

Part B: New Clients by Region 2003-2009

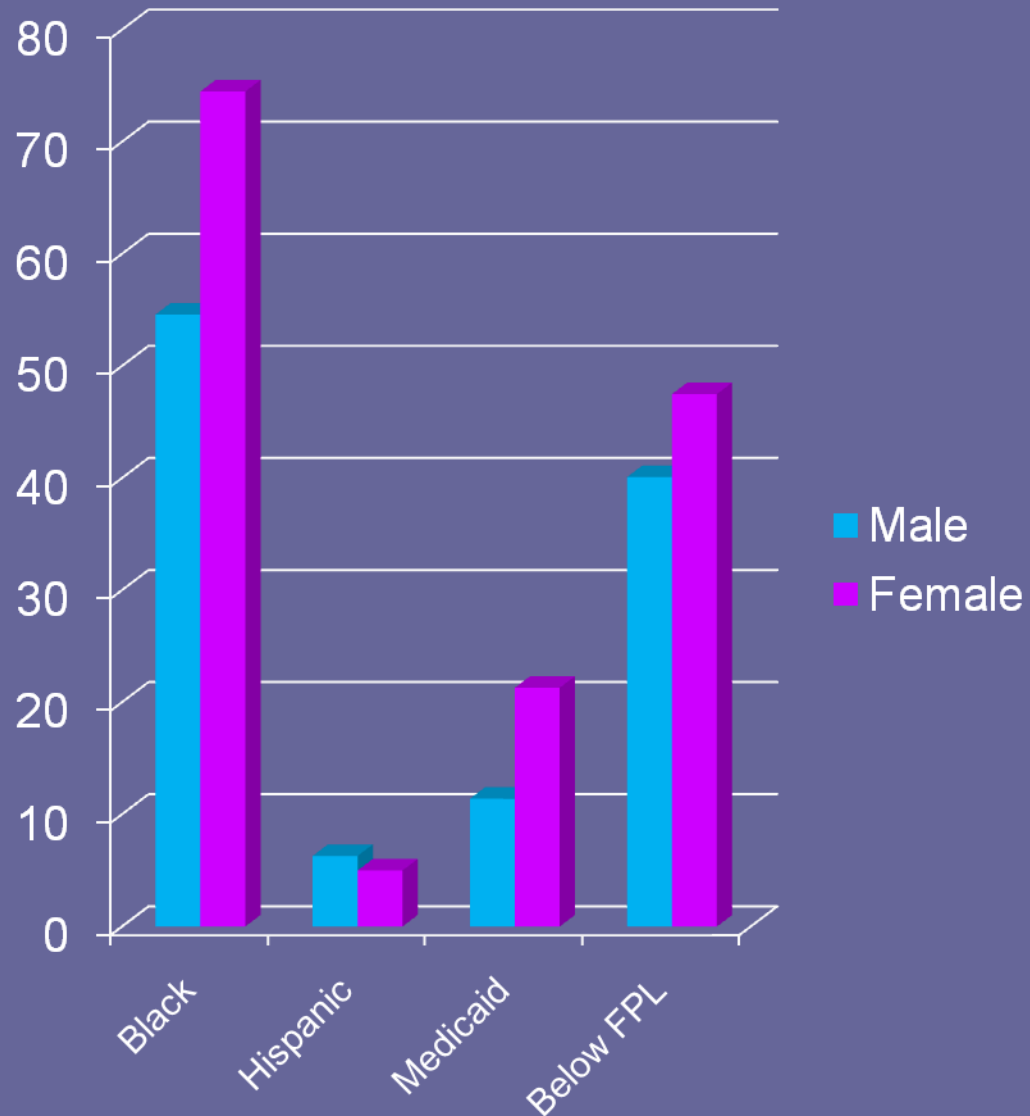

New Clients: April 2008 to March 2009

- Demographic comparisons are difficult because new clients are missing data at a higher rate than continuing clients

Male and Female Clients

- Higher percentage of females are Black and receive Medicaid
- 63% of females have heterosexual contact as main HIV risk, while only 23% of men report this as their main risk
- MAI served 9.2% of all females and 5.4% of all males

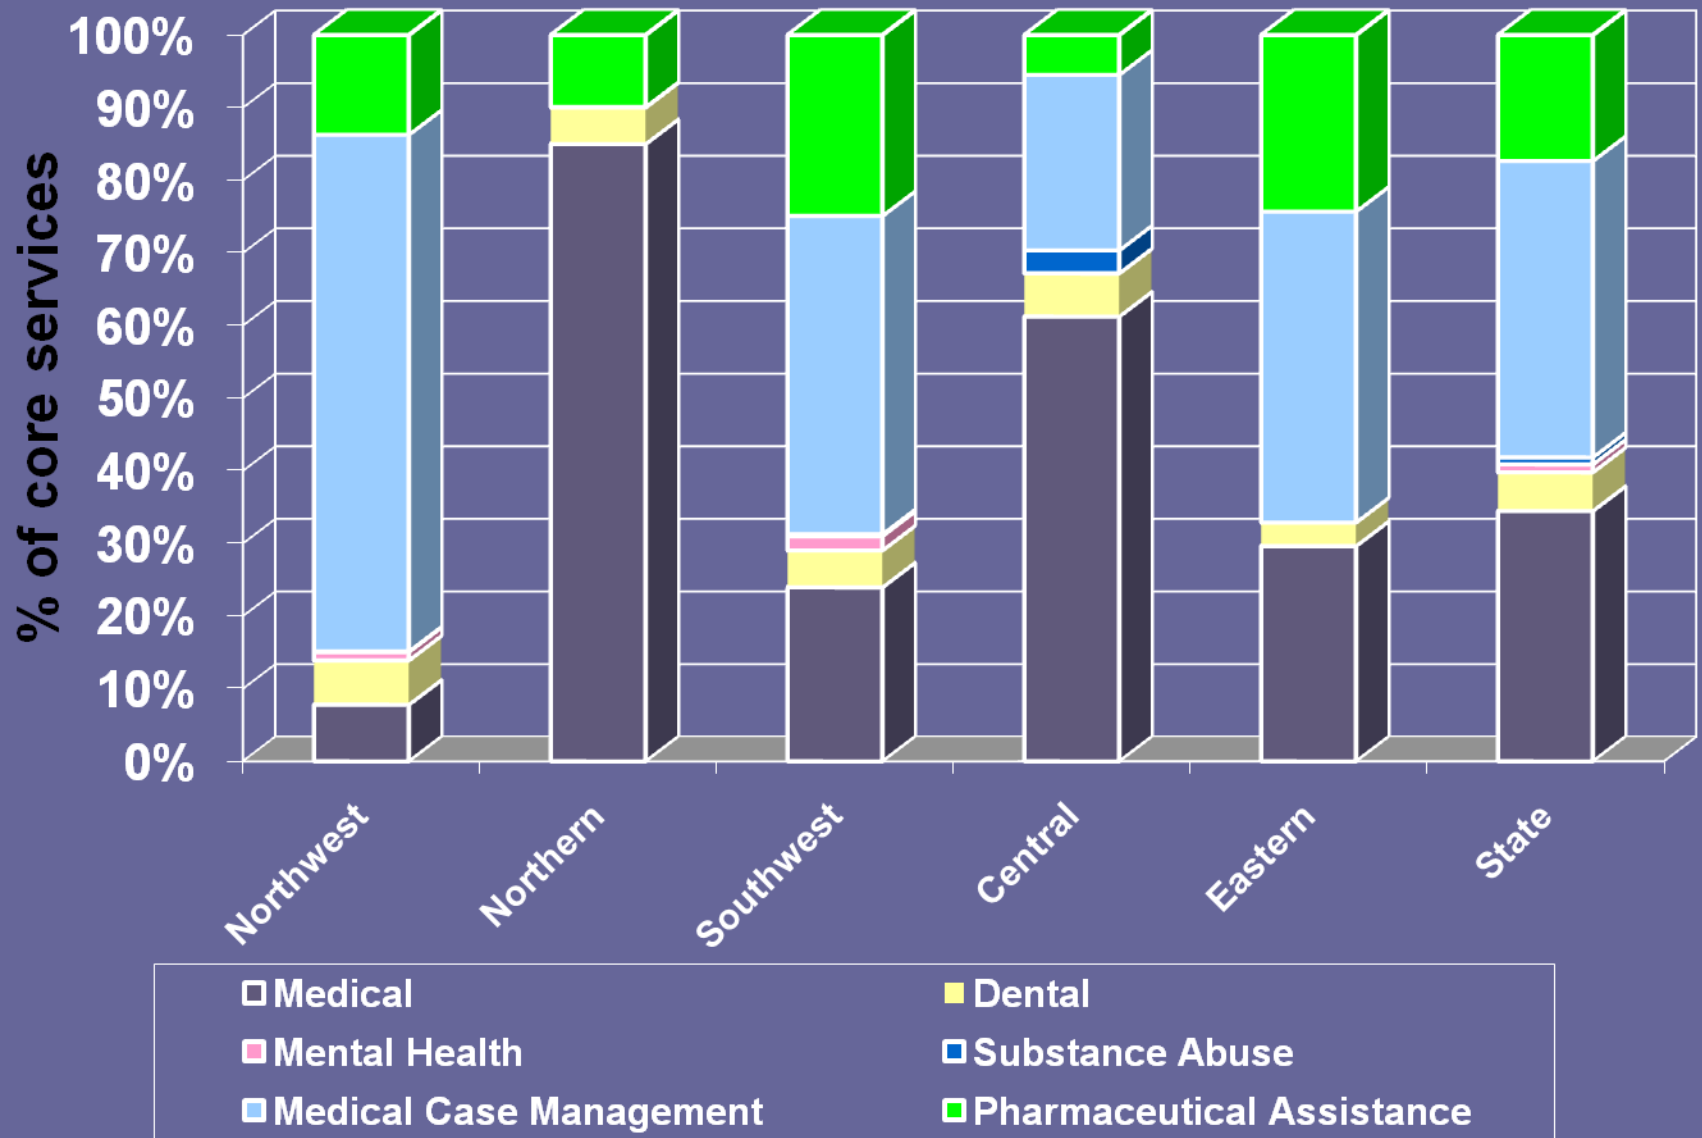

Part B Statewide Summary: Clients by Service Area (No ADAP)

Part B Core Services by Region

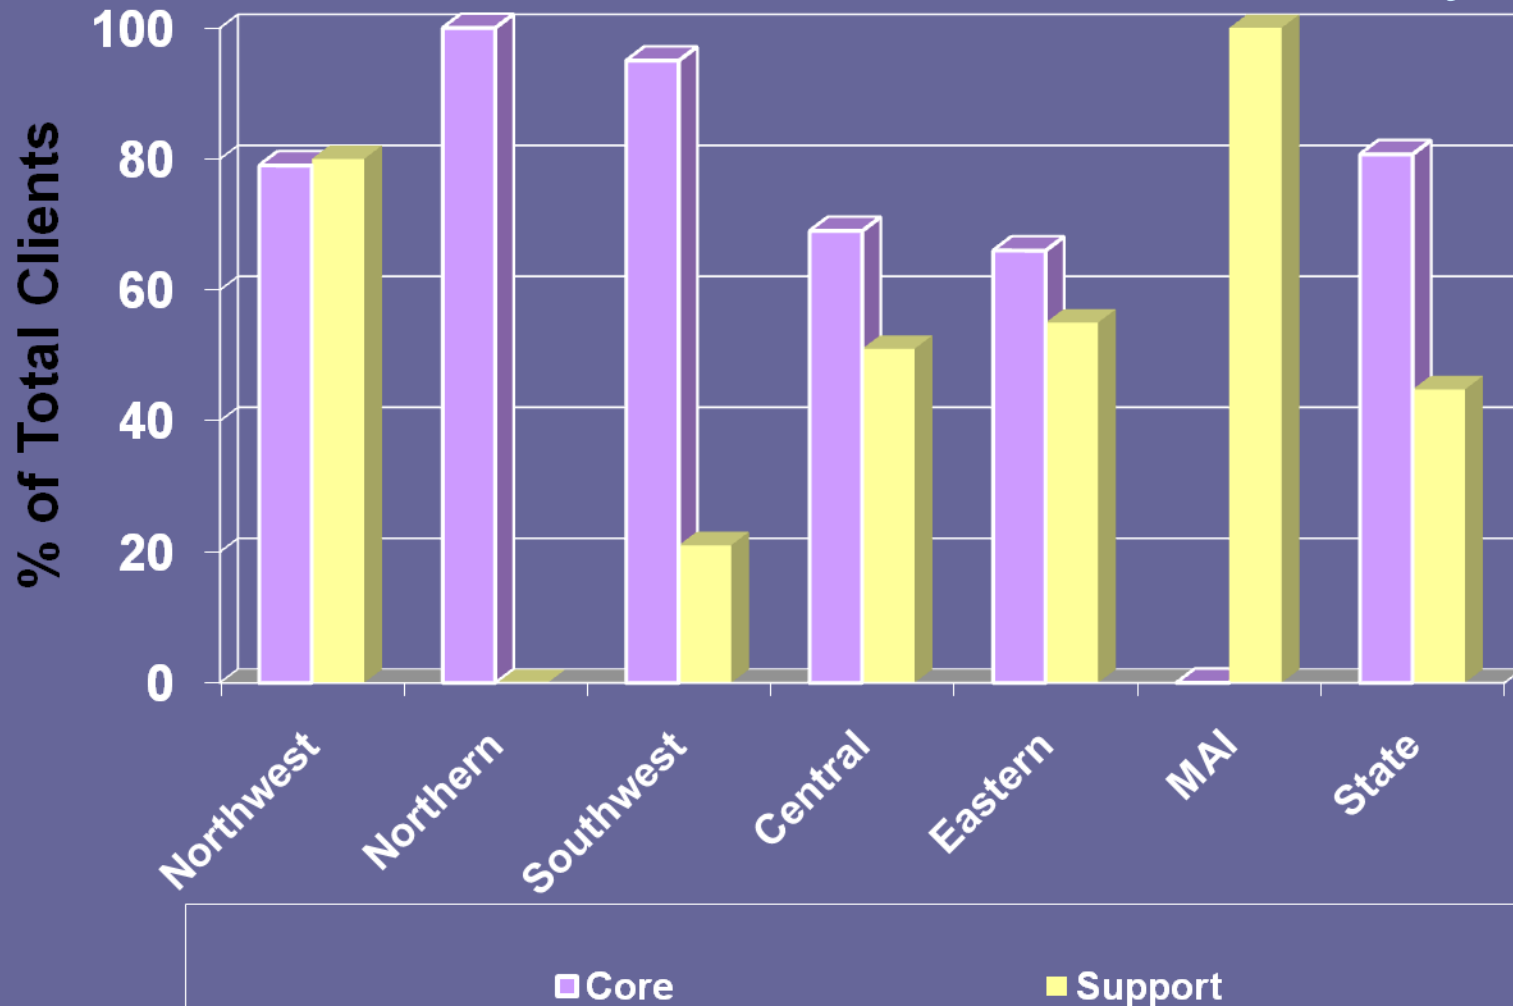

April 2008 to March 2009

Part B Services by Region

April 2008 to March 2009
