

Public Safety Radio Strategic Planning Committee

Public Safety Radio Strategic Planning Committee (PSRSPC)

In 2002, the California Legislature enacted the California Public Safety Communications Act of 2002*. This act established the PSRSPC which gives primary responsibility to state government for the following:

- Development and implementation of a statewide integrated public safety communications system to facilitate interoperability among state public safety agencies, as well as other first responder agencies.
- Coordination of other shared uses of public safety radio frequency spectrum.

*Government Code §§8592 – 8592.7

PSRSPC Membership

Established by statute to address the need for an integrated public safety communications system that facilitates interoperability among the state's public safety departments (with existing communication systems), in collaboration with other federal, state, and local entities.

California Highway Patrol (CHP)

California Military Department (CMD)

Department of Corrections and Rehabilitation (CDCR)

Department of Finance (DOF)

Department of Fish and Game (DFG)

Department of Forestry and Fire Protection (CAL FIRE)

Department of General Services (DGS)

Department of Justice (DOJ)

Department of Parks and Recreation (DPR)

Department of Public Health (CDPH)

Department of Transportation (Caltrans)

Department of Water Resources (DWR)

Emergency Medical Services Authority (EMSA)

Governor's Office of Emergency Services (OES)

Governor's Office of Homeland Security (OHS)

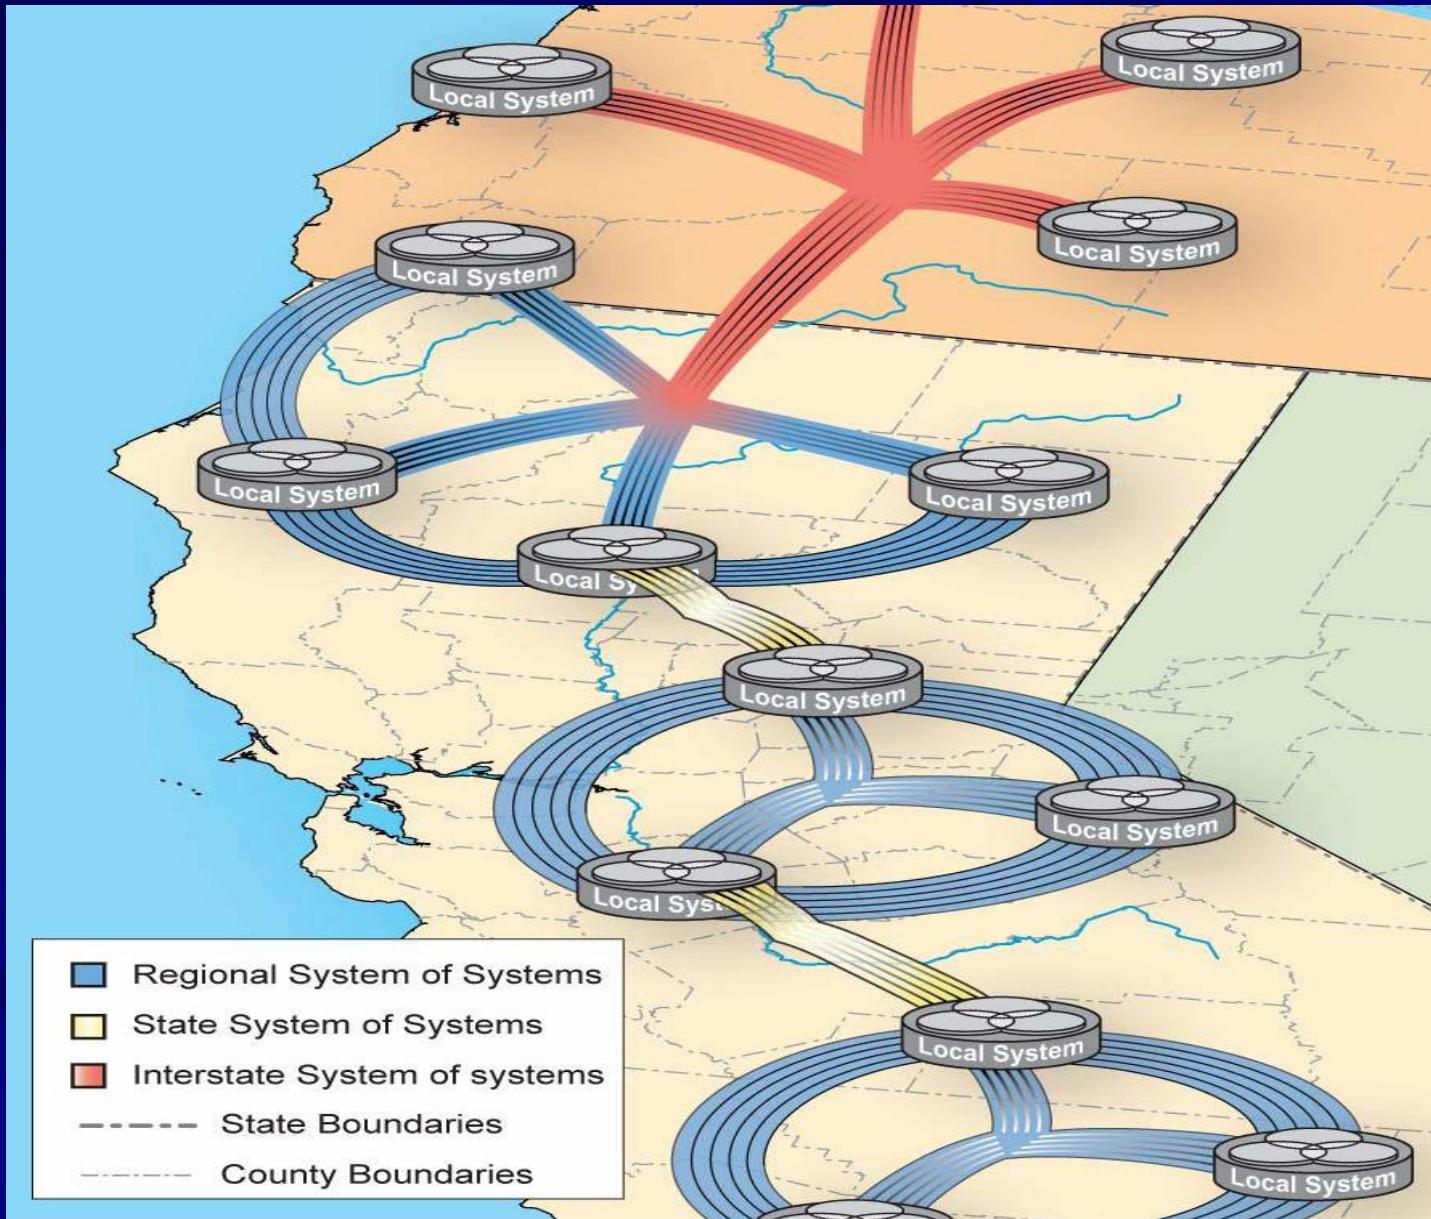

PSRSPC Vision

- Development, implementation, and administration of an innovative, inclusive, scalable, and sustainable statewide interoperable communications plan.
- Facilitate modernization of wireless communication systems and interoperability.
- Provide effective, seamless, and reliable public safety services throughout California.

PSRSPC Mission

- Provide the leadership to allow California to effectively leverage existing investments in communications infrastructures.
- Respond rapidly and decisively to meet targeted goals for improved interoperability.
- Facilitate universal statewide access, enhance system modernization, increase functionality, and ensure adequate channel availability throughout California in support of public safety.

Seamless Interoperability

PSRSPC Collaboration Guidelines

- Partnerships allow for a stronger voice than one department or agency alone; all member agencies and departments have an equal voice.
- Respecting departmental perspectives is paramount to effective collaboration; all issues raised by members provide valuable information.
- Fostering partnerships between state agencies is fundamental to achieve strategic goals; decision-making is conducted based on a majority vote process.

PSRSPC Consulting Organizations

- California State Peace Officers' Association
- California Police Chiefs' Association
- California State Sheriffs' Association
- California Professional Firefighters
- California Fire Chiefs' Association
- California State Association of Counties
- League of California Cities
- California State Firefighters' Association
- California Coalition of Law Enforcement Associations
- California Correctional Peace Officers' Association
- CDF Firefighters
- California Union of Safety Employees

Technical Working Group

At the direction of the PSRSPC Executive Committee, the Technical Working Group (TWG) is comprised of PSRSPC member agency personnel and functions as the primary focal point for ongoing technical research and special studies.

Coordination with California Statewide Interoperability Executive Committee (CalSIEC)

The California Statewide Interoperability Executive Committee (CalSIEC) is tasked with managing the state and federally designated interoperability spectrum on behalf of all local public safety first responders. The PSRSPC is required to hold a joint meeting with CalSIEC to enhance coordination and cooperation at every organizational level, as well as, develop a cohesive approach to communications interoperability.

Road Map to 2017

The fundamental plan for PSRSPC members consists of three basic components:

- Develop 10 year Interoperability Strategic Plan; including critical operability, tactical interoperability, as well as governance procedures and policies.
- Design and secure long term, sustainable funding mechanisms.
- Build-out California's System of Systems (SoS) including governance agreements and protocols.

Public Safety Interoperable Communications Grant

PSIC

Northern Planning Area	\$2,444,897.26
Central Planning Area	\$5,431,433.30
Capitol Bay Planning Area	\$22,793,965.22
Southern Planning Area	\$44,557,312.22
California State Agencies	\$18,806,902.00

California's Total Award: \$94,034,510.00

PSRSPC Initiatives for PSIC Funds

- Improvement of Statewide Mutual Aid Infrastructure
- Upgrade of the OASIS System
- Development of the Interoperability Field Operations Guide
- Statewide Rollout of the Communications Asset Survey and Mapping Tool
- Completion of Tactical Interoperable Communications Plans
- Development of a 10-year Interoperability Strategic Plan
- Statewide Communications Unit Leader Training
- CalSIEC and PSRSPC Support
- Critical Operability Projects for each PSRSPC Agency
